SUMMARY

Data scientist and former software engineer who pairs technical depth (Python, C++, machine learning, statistics) with the ability to pitch and ship ideas to clients. Delivered AI solutions for international hospitality brands before starting an MSc in Data Science at King's College London. Now focused on applying quantitative methods to trading, where decisions are judged by results.

EDUCATION

King's College London <i>MSc Data Science</i>	2026-2027(Expected)
Panimalar Institute of Technology <i>B.Tech Artificial Intelligence And Data Science</i>	2020-2024 <i>CGPA 8.43/10</i>
National Public School <i>XII-HSC-CBSE</i>	2018-2019 <i>82.5%</i>

SKILLS

Technical Skills: Python, R, C++, SQL, Java, Machine Learning, Data Analysis, DSA, JavaScript, AR/VR, ReactJs

Business Skills: Presentation skills, Business Analytics

Tools: Excel, MS Office, M365, PowerAutomate, PowerApps

Platforms: Jupyter Notebook, VSCode, Google Colab, Unity, Blender

Soft Skills: Communication, Collaborative, Problem-solving, Analytical thinking, Quick Learner, Leadership

Languages: English, Tamil, Hindi

WORK EXPERIENCE

LTI Mindtree <i>Software Engineer</i>	Feb 2025 - Aug 2026
- Worked on Multiple projects and enabled AI Infusion in all of them, using No Code/Low Code and LLMs and SLMs - Built six AI-based POCs for different Hospitality, Logistics and Airline clients and increased past project efficiency by 30% by infusing AI into existing features. - Pitched Redemption AI Platform to a global hospitality client and converted into a production feature for their loyalty redemption team.	
Ripen Labs <i>Entrepreneurship-in-Residence</i>	Virtual June 2023 - Sept 2023
- Built an online community of 400 students within 3 weeks for the Product - Built an online forum for legit information on Job and Internship openings for College Students and Freshers	

PROJECTS

Quant-Signal-Lab - Deep Learning	Aug 2026
- Built a leakage-safe walk-forward research framework to evaluate next-day return predictions (ridge, gradient boosting, MLP) on daily ETF data, with volatility-targeted, transaction-cost-aware backtests. - Assessed skill with out-of-sample R^2, rank IC, and Sharpe ratios with confidence intervals and multiple-testing-corrected p-values; validated the framework with 21 unit tests and null/planted-signal controls.	
Blind-Aid - Deep Learning	Jan 2024
- Blind-Aid is a tool designed and built to bridge the gap between visually and Hearing-Impaired individuals and non-impaired individuals - Blind-Aid utilises lip-reading via LipNet, converts it to text, and the text is converted into Morse code and Morse code is transmitted via haptic feedback in mobile phones and handheld devices with a vibration motor to the visually and hearing-impaired	

ACHIEVEMENTS

Ideathon - Lemon Ideas
Pre-Finalist in Lemon Ideas Ideathon event, after successfully competing in six elimination rounds

TNSI - Tamil Nadu MSME Department

Participated and attended the Bootcamp round of the Tamil Nadu Student Innovators Event organised by TN MSME Department to facilitate Products, Services, start-ups, and Entrepreneurs to help and improve Micro and Small Industries of Tamil Nadu
